

Power Up Your Business with TrulinX

BUSINESS
TRANSFORMATION

Get the power and flexibility to offer better service to your customers and vendors.

TrulinX distribution management software by Tribute, Inc. is designed exclusively for distributors of hose, fittings, gaskets, rubber materials and related products.

TrulinX On-Premise Solution and TrulinX Cloud are the same niche-focused ERP solution we've provided for nearly 40 years, packed with all the rich features you would expect as an industrial distributor. The only difference is how their connection is hosted. TrulinX On-Premise is deployed on a single server maintained at your site, while TrulinX Cloud is hosted on a network of connected virtual cloud servers.

Tribute is offering a special promotion for IDCO members that **purchase the TrulinX software system within 90 days of the 2021 IDCO Expo.**
